SUMMARY

Software engineer with 3 years of experience in full-stack development and AI integration. I can help you with your entire development cycle from building scalable, secure web applications to designing RAG pipelines, integrating LLMs, and automating workflows that boost team productivity. I won 8th place in Teknofest 2025 in the Humanity Competition Health Technologies category. I have strong problem-solving, communication, and innovative thinking skills, and I learn fast.

EXPERIENCE

CODED **Kuwait *(Remote)***
Software & AI Developer *Mar 2026 – Present*

- Leading the migration of a **12+ module** enterprise system from Airtable to a custom-built ERP platform using **Next.js** and **ERPNext**, starting with the first fully migrated section after one month of development.
- Built a custom **drag-and-drop form builder** enabling non-technical staff to design and deploy student-facing forms without third-party tools.
- Developing **Figma extensions** and AI-powered **Slack bots** to automate internal workflows, reducing manual effort across departments.
- Integrating **OpenClaw** and **Claude** to embed AI capabilities into daily employee operations, accelerating task completion and decision-making.

JUSTICE4.0 **Helsinki, Finland *(Remote)***
Software Development & AI Developer (LegalTech) (Part-time) *Aug 2025 – Present*

- Developing **SnowLex**, an AI-powered legal research platform built on advanced **RAG pipelines** with a **Next.js** frontend and **Node.js / FastAPI** backend.
- Designing **Qdrant-based hybrid search** over **2M+ self-embedded legal vectors**, using the **multilingual BGE-M3 embedding model** with data-driven filtering and enriched metadata.
- Integrating **Ollama Poro 2** for legally grounded Finnish and EU inference with precise source-backed citations.
- Deploying scalable services on **Google Cloud** and laying the groundwork for **agent-based legal reasoning**.

Tigflo **Sharjah, UAE *(Remote)***
Software Architect – Code Quality Oversight | Front-End Developer (Freelance) *Dec 2024 – Present*

- Building and reviewing production code across web (Next.js), mobile (Flutter), and backend (Node.js) systems.
- **Built 500+** reusable, multi-theme (light/dark) UI components and delivered **140+ responsive screens** across dashboard, mobile, and web products.
- Established scalable design systems and code review processes across design and engineering teams.

Ticket Travel and Tourism **Muscat, Oman**
Full-Stack Developer (Remote) *Apr 2025 – Oct 2025*

- Developed a full-scale self-service tourism platform (booking, CRM, ERP) using Next.js, Node.js, Prisma.
- Built scalable, multi-tenant AWS architecture to support future, white-labeled deployments.

Zoom Property **Istanbul, Turkey**
Software Development Engineering Intern *Aug 2023 – Nov 2023*

- Built a CRM system with real-time updates and automated workflows for a tourism branch.

PROJECTS

Rheumatoid Arthritis Monitoring System (RMTS) – Teknofest 2025, 8th Place **Istanbul, Turkey**
Lead Software Engineer *Aug 2024 – Oct 2025*

- Led a team of 4 to build an end-to-end wearable health monitoring system: a smart glove with motion, flex, PPG, and pressure sensors on an **ESP32** controller communicating via **Bluetooth Low Energy**.
- Developed a **Flutter** mobile app with automatic glove detection/pairing and real-time vitals display, designed for patients with limited joint mobility.
- Built a **Next.js** doctor dashboard for patient management, trend monitoring, appointment booking, and **AI-generated medical reports** from sensor data.
- Embedded a vibration-based relief mechanism that activates during detected flare-ups. Ranked **8th at Teknofest 2025 among 13,000+ projects**.

Plant AI **Personal Project**

Flutter, Dart, Firebase, Plant.id API, MVVM

- Built a cross-platform AI plant identification app recognizing **1,000+ species** in under 3 seconds, with disease detection covering **50+ conditions** and treatment recommendations.
- Implemented personal garden management with smart watering reminders, health tracking, and **Firebase-synced** offline support with dark/light theme UI.

LocaLink – Location-Based Social Media App **Graduation Project**

Flutter, Firebase, Mapbox, Geofencing, Google Vision, Google Cloud NLP

- Developed a map-centric social platform with location-based posts, event creation with ticket booking, and friend visibility within a 1km radius.
- Implemented **geofencing logic** for restricted areas and dual browsing modes (local/global). Tested within university communities with positive feedback.

EDUCATION

Üsküdar Üniversitesi **Istanbul, Turkey**

B.Sc. Software Engineering (GPA: 3.22/4.00)

ACTIVITIES & LEADERSHIP

Codyle Student Club (cscuskudar) **Istanbul, Turkey**

Club President *Sep 2022 – Jul 2024*

- Led tech events and delivered talks on Frontend, UI/UX, and .NET technologies.

SKILLS

AI / ML: RAG Pipelines, Qdrant, Ollama, Claude API, OpenClaw, BGE-M3 Embeddings, Vector Search

Programming: TypeScript, Python, JavaScript, Dart, SQL | Next.js, React, Node.js, FastAPI, Flutter, ASP.NET | PostgreSQL, MongoDB, Redis

Tools & Platforms: Google Cloud, AWS, Azure, Docker, Vercel, GitHub Actions, Linux, ERPNext, Prisma, Drizzle, Firebase, Supabase, Git, N8N, Figma, Tailwind, Slack API, Figma Extensions API

Methodologies: RESTful API, tRPC, OAuth, JWT, NextAuth, SOLID, MVVM, Agile, CI/CD, Bluetooth/IoT

LANGUAGES

Arabic (Native) | **English** (Fluent) | **Turkish** (Basic)
